

NylonPlus®

Industrial Recycled Nylon Yarn

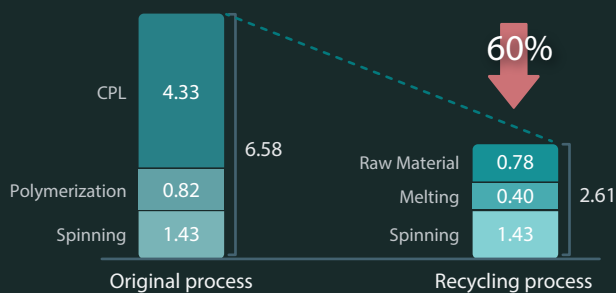

NylonPlus® is the high quality Nylon yarn made from pre-consuming Nylon waste. By using the eco-technology of the recycling process, NylonPlus® reduces the environmental burden and conserves the natural resources. In addition, the quality performs the same as virgin Nylon.

Comparison of the energy consumption (unit: kwh/ton)

Comparison of the CO₂ emissions (unit: kg.CO₂e/kg)

Features

Post industrial waste from production, no additional consumption to petrochemical.

Excellent quality and can for any application.

Application

Sports & outdoor wear

Fashion & urban elegance

Uniform & workwear

Hometextile

Specification

- FDY: (15~800)D / (5~196)F
- DTY: (10~340)D / (5~96)F
- SD / FD / BR yarn and solution dyed yarn
- Other customized specification

Certification

- Global Recycled Standard (GRS)
Registration No. CU828056
- Oeko-Tex Standard 100
